Professional Summary

Strategic Information Technology Executive with over 14 years of experience leading enterprise technology strategy, digital transformation, cybersecurity, and IT governance across education, retail, food & beverage, and service sectors. Proven track record of aligning technology initiatives with business objectives, driving organizational transformation, modernizing infrastructure, and strengthening cybersecurity resilience. Currently leading technology operations supporting more than 4,000 students and 500 employees and educators, while managing a team of 13 IT professionals and an annual technology budget exceeding SAR 1 million. Experienced in cloud computing, enterprise systems, business intelligence, data analytics, AI-driven automation, and large-scale technology programs. Demonstrated success in reducing operational costs, enhancing service delivery, improving decision-making through data-driven insights, and delivering measurable business value through technology leadership.

Professional Experience

Head of IT Department - Delta Education & Training / Delta Maintenance and Cleaning | Riyadh, Kingdom of Saudi Arabia | October 2022 - Present

- Lead enterprise-wide IT strategy, digital transformation, cybersecurity, and technology governance initiatives across multiple business units serving more than 4,000 students and 500 employees and educators.
- Manage an annual IT budget exceeding SAR 1 million while reducing operational technology costs by 25% through strategic vendor management, infrastructure optimization, and cost-control initiatives.
- Direct and mentor a high-performing team of 13 IT professionals across infrastructure, cybersecurity, applications, and technical support functions.
- Develop and implement IT governance frameworks, cybersecurity policies, risk management programs, business continuity plans, and technology standards aligned with organizational objectives.
- Strengthen cybersecurity posture through the implementation of Multi-Factor Authentication (MFA), endpoint protection, identity and access management controls, and security monitoring practices.
- Lead infrastructure modernization initiatives to enhance system reliability, scalability, network performance, and operational resilience across the organization.
- Design and deploy executive-level Power BI dashboards and analytics platforms that enable data-driven decision-making and performance monitoring.
- Drive automation and AI-powered initiatives to streamline business processes, reduce manual effort, improve productivity, and accelerate operational efficiency.
- Improve IT service delivery performance by reducing support response times by 98%, decreasing average response time from 48 hours to 1 hour.
- Manage strategic technology partnerships and vendor relationships to maximize business value and ensure alignment between technology investments and corporate objectives.
